

AN AMALGAMATION OF ANCIENT AND MODERN ART AT THIS SHOW

Artist Louis Despont's show, titled 'Greenhouse', showcases her work on old ledger paper with original notations obscured by successive layers of mark making. Her drawings open a space that is both ancient and contemporary. She creates an archaic atmosphere suggested by the paper together with the sense of layering and erasure. The sensitivities of pencil, paper and ink provide a transparency that forces audiences to not just look at the works but through them, to the motivating forces behind them. This must-see

show is on until September 1 at Galerie Isa.
